

Product Name: Recombinant Human DCXR (N-6His)
Catalog #: PEH1109

Summary

Name	L-xylulose reductase/DCXR
Purity	Greater than 95% as determined by reducing SDS-PAGE
Endotoxin level	<1 EU/μg as determined by LAL test.
Construction	Recombinant Human L-Xylulose Reductase is produced by our E.coli expression system and the target gene encoding Met1-Cys244 is expressed with a 6His tag at the N-terminus.
Accession #	Q7Z4W1
Host	E.coli
Species	Human
Predicted Molecular Mass	28.1 KDa
Formulation	Supplied as a 0.2 μm filtered solution of 50mM Tris-HCl, 150mM NaCl, 1mM DTT, 30% Glycerol, pH 8.0.
Shipping	The product is shipped on dry ice/polar packs. Upon receipt, store it immediately at the temperature listed below.
Stability&Storage	Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 months under sterile conditions after opening. Please minimize freeze-thaw cycles.
Reconstitution

Background

Alternative Names L-Xylulose Reductase; XR; Carbonyl Reductase II; Dicarboxyl/L-Xylulose Reductase; Kidney Dicarboxyl Reductase; kiDCR; Sperm Surface Protein P34H; DCXR

Product Name: Recombinant Human DCXR (N-6His)
Catalog #: PEH1109

Background

L-Xylulose Reductase is an enzyme that belongs to the Short-Chain Dehydrogenases/Reductases (SDR) family. L-Xylulose Reductase is responsible for the metabolism of Xylulose, converting it into Xylitol. L-Xylulose Reductase catalyzes the NADPH-dependent reduction of several Pentoses, Tetroses, Trioses, α -Dicarbonyl compounds and L-Xylulose. L-Xylulose Reductase participates in the Uronate Cycle of Glucose metabolism. It may play a role in the water absorption and cellular osmoregulation in the proximal renal tubules by producing Xylitol, an osmolyte, thereby preventing osmolytic stress from occurring in the renal tubules.
