Background

Peroxiredoxin 6 belongs to the thiol-specific antioxidant protein family, which is a bifunctional enzyme with two distinct active sites. Peroxiredoxin 6 is involved in redox regulation of the cell and can reduce Hydrogen peroxide and short chain organic, fatty acid, and phospholipid hydroperoxides. Peroxiredoxin 6 may regulate phospholipid turnover and protect against oxidative injury. Peroxiredoxin 6 eases the oxidative stress and TGF-beta-induced abnormalities of human trabecular meshwork cells, it is necessary for blood vessel integrity in injured skin.
