

Product Name: Recombinant Human PITPNA (N-6His)
Catalog #: PEH1330

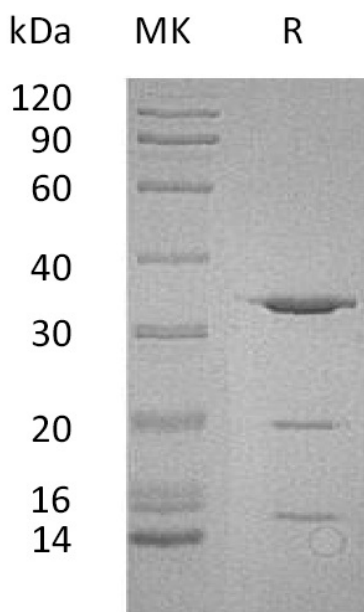

Summary

| | |
|---------------------------------|--|
| Name | PITPNA/PITPN |
| Purity | Greater than 95% as determined by reducing SDS-PAGE |
| Endotoxin level | <1 EU/μg as determined by LAL test. |
| Construction | Recombinant Human Phosphatidylinositol Transfer Protein Alpfa Isoform is produced by our E.coli expression system and the target gene encoding Met1-Asp270 is expressed with a 6His tag at the N-terminus. |
| Accession # | Q00169 |
| Host | E.coli |
| Species | Human |
| Predicted Molecular Mass | 34 KDa |
| Formulation | Supplied as a 0.2 μm filtered solution of 20mM Tris-HCl, 1mM EDTA, 1mM DTT, pH 8.0. |
| Shipping | The product is shipped on dry ice/polar packs. Upon receipt, store it immediately at the temperature listed below. |
| Stability&Storage | Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 months under sterile conditions after opening. Please minimize freeze-thaw cycles. |
| Reconstitution | |

Product Name: Recombinant Human PITPNA (N-6His)
Catalog #: PEH1330

Alternative Names

Phosphatidylinositol Transfer Protein Alpha Isoform; PI-TP-Alpha; PtdIns Transfer Protein Alpha; PtdInsTP Alpha; PITPNA; PITPN

Background

Phosphatidylinositol Transfer Protein α Isoform (PITPNA) is found in the cytoplasm and belongs to the PtdIns transfer protein family. PITPNA is a ubiquitous and highly conserved protein in multicellular eukaryotes that catalyzes the exchange of phospholipids between membranes and participates in cellular phospholipid metabolism, signal transduction and vesicular trafficking in vivo. It is expressed in a wide range of tissues and implicated in phospholipase C signaling and in the production of phosphatidylinositol 3, 4, 5-trisphosphate (PIP3) by phosphoinositide-3-kinase.
