## **Product Name: Recombinant Human SNCG**

Catalog #: PEH1545

### **Summary**

Name SNCG/Gamma-synuclein

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/µg as determined by LAL test.

Construction Recombinant Human Gamma-Synuclein is produced by our E.coli expression

system and the target gene encoding Met1-Asp127 is expressed.

Accession # 076070

Host E.coli

**Species** Human

**Predicted Molecular Mass** 13.6 KDa

**Formulation** Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

**Shipping** The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

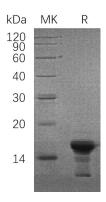

Store at  $\leq$ -70°C, stable for 6 months after receipt. Store at  $\leq$ -70°C, stable for 3 Stability&Storage

months under sterile conditions after opening. Please minimize freeze-thaw

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. ## **Background**

# **Product Name: Recombinant Human SNCG**

Catalog #: PEH1545

Alternative Names Gamma-Synuclein; Breast Cancer-Specific Gene 1 Protein; Persyn; Synoretin; SR;

SNCG; BCSG1; PERSYN; PRSN

Background Gamma-Synuclein (SNCG) is a member of the Synuclein protein family. Gamma-

Synuclein is mostly expressed in the peripheral nervous system and retina. Gamma-Synuclein plays a role in neurofilament network integrity and may be involved in modulating axonal architecture during development and in the adult. In addition, it may also function in modulating the keratin network in skin. SNCG expression in breast tumors has been as a marker for tumor progression. SNCG is also believed to be involved in the pathogenesis of neurodegenerative diseases.
