Product Name: Recombinant Human STUB1

Catalog #: PEH1577

Summary

Name STUB1/CHIP

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human E3 Ubiquitin-Protein Ligase CHIP is produced by our

E.coli expression system and the target gene encoding Met1-Tyr303 is

expressed.

Accession # Q9UNE7

Host E.coli

Species Human

Predicted Molecular Mass 34.86 KDa

Formulation Supplied as a 0.2 µm filtered solution of PBS, pH 7.4.

Shipping The product is shipped on dry ice/polar packs. Upon receipt, store it immediately

at the temperature listed below.

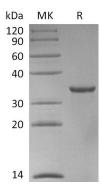

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Background

Alternative Names E3 Ubiquitin-Protein Ligase CHIP; Antigen NY-CO-7; CLL-Associated Antigen KW-8;

Carboxy Terminus of Hsp70-Interacting Protein; STIP1 Homology and U Box-

Containing Protein 1; STUB1; CHIP

Product Name: Recombinant Human STUB1 Catalog #: PEH1577

Background

E3 Ubiquitin-Protein Ligase CHIP is a cytoplasmic protein. CHIP is highly expressed in skeletal muscle, heart, pancreas, brain and placenta. CHIP interacts with the molecular chaperones Hsc70-Hsp70 and Hsp90 through its TPR domain; lead to in client substrate ubiquitylation and degradation by the proteasome. CHIP targets misfolded chaperone substrates towards proteasomal degradation. CHIP mediates transfer of non-canonical short ubiquitin chains to HSPA8 that have no effect on HSPA8 degradation. CHIP plays a role in base-excision repair: catalyzes polyubiquitination by amplifying the HUWE1/ARF-BP1-dependent monoubiquitination and leading to POLB-degradation by the proteasome. It also may regulate the receptor stability and activity through proteasomal degradation.
