## **Product Name: Recombinant Human OSM (N-6His)**

Catalog #: PEH2009

### **Summary**

Name Oncostatin M/OSM

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <0.01 EU/μg as determined by LAL test.

Construction Recombinant Human Oncostatin M is produced by our E.coli expression

system and the target gene encoding Ala26-Arg221 is expressed with a 6His

tag at the N-terminus.

Accession # P13725

**Host** E.coli

**Species** Human

Predicted Molecular Mass 24.44 KDa

Formulation Lyophilized from a 0.2 μm filtered solution of 20mMTris-HCl, 1mM EDTA, 200mM

NaCl, pH 7.5.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

**Stability&Storage** Lyophilized protein should be stored at  $\leq$  -20°C, stable for one year after receipt.

Reconstituted protein solution can be stored at 2-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at  $\leq$  -20°C for 3 months.

**Reconstitution** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. # **Product Name: Recombinant Human OSM (N-6His)**

Catalog #: PEH2009

### **Alternative Names**

Oncostatin-M: OSM

### **Background**

Oncostatin M (OSM) is a glycoprotein belonging to the interleukin-6 family of cytokines that includes leukemia-inhibitory factor, granulocyte colony-stimulating factor, and interleukin 6. OSM encodes a growth regulator, which Inhibits the proliferation of a number of tumor cell lines. It stimulates proliferation of AIDS-KS cells. OSM regulates cytokine production, including IL-6, G-CSF and GM-CSF from endothelial cells. OSM is considered as a pleiotropic cytokine that initiates its biological activities through specific cell surface receptors. The low affinity LIF receptor that shares the similarity of containing protein gp130 has now been identified to be a component of a high- affinity OSM receptor that will transduce OSM signals. OSM has also been shown to play a role in both pro and anti-inflammatory actions. OSM may also be involved in many biometabolism processes including liver development, haematopoeisis, inflammation, bone formation and destruction and possibly CNS development.

### Note

For Research Use Only, Not for Diagnostic Use.
