## **Product Name: Recombinant Human FcRL1 (C-6His)**

Catalog #: PHH0327

#### **Summary**

Name FCRL1/FcRH1/CD307a

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/µg as determined by LAL test.

Construction Recombinant Human Fc Receptor-Like Protein 1 is produced by our

Mammalian expression system and the target gene encoding Ala17-Asn303 is

expressed with a 6His tag at the C-terminus.

Accession # Q96LA6

Host **Human Cells** 

**Species** Human

**Predicted Molecular Mass** 32.24 KDa

**Formulation** Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, 1mM EDTA,

pH 7.4.

**Shipping** The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 Stability&Storage

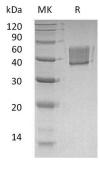

months under sterile conditions after opening. Please minimize freeze-thaw

cvcles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. ### **Background**

# **Product Name: Recombinant Human FcRL1 (C-6His)**

Catalog #: PHH0327

Alternative Names Fc Receptor-Like Protein 1; FcR-Like Protein 1; FcRL1; Fc Receptor Homolog 1;

FcRH1; IFGP Family Protein 1; hIFGP1; Immune Receptor Translocation-Associated

Protein 5; CD307a; FCRL1; FCRH1; IFGP1; IRTA5

**Background** Fc Receptor-Like Protein 1 (FCRL1) is a single-pass type I membrane protein that may function as an activating coreceptor in B cells. FCRL1 is primarily expressed in

secondary lymphoid tissues by mature subsets of B cells. It can be detected in the spleen, lymph node, heart, skeletal muscle, kidney, liver and placenta. It is specifically expressed by mature B lineage cells with higher expression at the protein level in naive B cells compared to memory B cells. FCRL1 contains three extracellular C2-like immunoglobulin domains, a transmembrane domain, and a cytoplasmic domain with two immunoreceptor-tyrosine activation motifs and may

play a role in the regulation of cancer cell growth.
