Product Name: Recombinant Human ICAM-1 (C-6His) Catalog #: PHH0357

Summary

Name ICAM-1/ICAM1/CD54/Intercellular adhesion molecule 1

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/µg as determined by LAL test.

Construction Recombinant Human Intercellular Adhesion Molecule 1 is produced by our

Mammalian expression system and the target gene encoding Gln28-Glu480 is

expressed with a 6His tag at the C-terminus.

Accession # P05362

Host **Human Cells**

Species Human

Predicted Molecular Mass 50.54 KDa

Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.2. **Formulation**

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 Stability&Storage

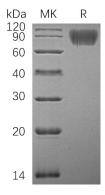

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Background

Alternative Names Intercellular Adhesion Molecule 1; ICAM-1; Major Group Rhinovirus Receptor;

CD54; ICAM1 **Background**Inter-Cellular

Inter-Cellular Adhesion Molecule 1 (ICAM1) is a type of intercellular adhesion molecule continuously present in low concentrations in the membranes of leukocytes and endothelial cells. As an endothelial and leukocyte-associated transmembrane protein, ICAM1 is well known for its importance in stabilizing cell-cell interactions and facilitating leukocyte endothelial transmigration. The presence of heavy glycosylation and other structural characteristics lend ICAM1 binding sites for a number of immune-associated ligands. Notably, ICAM-1 binds to macrophage adhesion ligand-1 (Mac-1; ITGB2 / ITGAM), leukocyte function associated antigen-1 (LFA-1/integrin), and fibrinogen.ICAM-1 expressed by respiratory epithelial cells is also the binding site for rhinovirus, the causative agent of most common colds.
