Product Name: Recombinant Human DPEP1 (C-6His) Catalog #: PHH0535

Summary

Name Dipeptidase 1/DPEP1

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human Dipeptidase 1 is produced by our Mammalian

expression system and the target gene encoding Asp17-Ser385 is expressed

with a 6His tag at the C-terminus.

Accession # P16444

Host Human Cells

Species Human

Predicted Molecular Mass 42.1 KDa

Formulation Supplied as a 0.2 µm filtered solution of PBS, 10% Glycerol, pH 7.4.

Shipping The product is shipped on dry ice/polar packs. Upon receipt, store it immediately

at the temperature listed below.

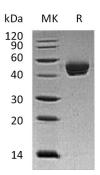

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Background

Alternative Names Dipeptidase 1; Dehydropeptidase-I; Microsomal Dipeptidase; Renal Dipeptidase;

hRDP; DPEP1; MDP; RDP

Background Dipeptidase 1 (DPEP1) is a kidney membrane enzyme that belongs to the

peptidase M19 family. DPEP1 is a homodimer and is inhibited by L-penicillamine.

Product Name: Recombinant Human DPEP1 (C-6His) Catalog #: PHH0535

C EnkiLife

DPEP1 hydrolyzes a variety of dipeptides and is implicated in renal metabolism of glutathione and its conjugates. DPEP1 is responsible for hydrolysis of the beta-lactam ring of antibiotics, such as penem and carbapenem. DPEP1 may play an important role in the regulation of leukotriene activity. DPEP1 expression in cancer is significantly higher than that in normal tissue. However, DPEP1 expression decreased with pathological differentiation, lymph-node and distant metastasis.

Note

For Research Use Only , Not for Diagnostic Use.
