Product Name: Recombinant Human HMGB2 (C-6His)

Catalog #: PHH0801

Summary

Name HMGB2/High mobility group protein B2

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/µg as determined by LAL test.

Construction Recombinant Human High Mobility Group Protein B2 is produced by our

Mammalian expression system and the target gene encoding Gly2-Glu209 is

expressed with a 6His tag at the C-terminus.

Accession # P26583

Host **Human Cells**

Species Human

Predicted Molecular Mass 25.07 KDa

Lyophilized from a 0.2 µm filtered solution of 20mM Tris-HCl, 100mM NaCl, pH **Formulation**

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Lyophilized protein should be stored at \leq -20°C, stable for one year after receipt. Stability&Storage

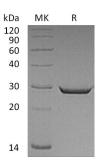

Reconstituted protein solution can be stored at 2-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at \leq -20°C for 3 months.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Product Name: Recombinant Human HMGB2 (C-6His) Catalog #: PHH0801

Alternative Names

High Mobility Group Protein B2; High Mobility Group Protein 2; HMG-2; HMGB2;

HMG2

Background

High Mobility Group Protein B2 (HMGB2) belongs to the non-histone chromosomal high-mobility group protein family. Members of this family are chromatin-associated and widely spread in the nucleus of higher eukaryotic cells. HMGB2 contains 2 HMG box DNA-binding domains. It is associated with chromatin and has the ability to bend DNA, preferentially single-stranded DNA. It is shown that HMGB2 is able to efficiently bend DNA and form DNA circles. In addition, HMGB2 is involved in the final ligation step in DNA end-joining processes of DNA double-strand breaks repair and V(D)J recombination.
