Product Name: Recombinant Human IgG4 Fc (224AA)

Catalog #: PHH0853

Summary

Name lgG4 Fc (Pro104-Lys327,Leu325Pro)

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human Ig Gamma-4 Chain C Region is produced by our

Mammalian expression system and the target gene encoding Pro104-

Lys327(Leu325Pro) is expressed.

Accession # P01861

Host Human Cells

Species Human

Predicted Molecular Mass 25.1 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.4.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

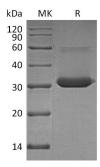

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Background

Product Name: Recombinant Human IgG4 Fc (224AA) Catalog #: PHH0853

Alternative Names Ig gamma-4 chain C region, IgG4 Fc

Background As a monomeric immunoglobulin that is predominately involved in the secondary

antibody response and the only isotype that can pass through the human placenta, Immunoglobulin G (IgG) is synthesized and secreted by plasma B cells, and constitutes 75% of serum immunoglobulins in humans. IgG antibodies protect the body against the pathogens by agglutination and immobilization, complement activation, toxin neutralization, as well as the antibody-dependent cell-mediated cytotoxicity (ADCC). IgG tetramer contains two heavy chains (50 kDa) and two light chains (25 kDa) linked by disulfide bonds, that is the two identical halves form the Y-like shape. IgG is digested by pepsin proteolysis into Fab fragment (antigen-

binding fragment) and Fc fragment (//
