## **Product Name: Recombinant Human LTBR (C-6His)** Catalog #: PHH1116

### **Summary**

Name Lymphotoxin beta R/TNFRSF3/LTBR

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/µg as determined by LAL test.

Construction Recombinant Human Lymphotoxin Beta Receptor is produced by our

Mammalian expression system and the target gene encoding Gln31-Met227

is expressed with a 6His tag at the C-terminus.

Accession # P36941

Host **Human Cells** 

**Species** Human

**Predicted Molecular Mass** 22.79 KDa

**Formulation** Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.4.

**Shipping** The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 Stability&Storage

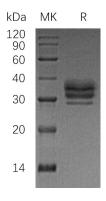

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. **C** EnkiLife

## **Background**

Alternative Names Tumor Necrosis Factor Receptor Superfamily Member 3; Lymphotoxin-Beta

Receptor; Tumor Necrosis Factor C Receptor; Tumor Necrosis Factor Receptor 2-Related Protein; Tumor Necrosis Factor Receptor Type III; TNF-RIII; TNFR-III; LTBR;

D12S370; TNFCR; TNFR3; TNFRSF3

**Background** Tumor necrosis factor receptor superfamily member 3, also known as

Lymphotoxin-beta receptor, Tumor necrosis factor C receptor, Tumor necrosis factor receptor 2-related protein, Tumor necrosis factor receptor type III, LTBR, TNFCR, TNFR3 and TNFRSF3, is a member of the tumor necrosis factor (TNF) family of receptors. LTBR is a single-pass type I membrane protein and contains four TNFR-Cys repeats. It is expressed on the surface of most cell types, but not on T and B lymphocytes. LTBR and its ligand play a role in the development and organization of lymphoid tissue and transformed cells. Activation of LTBR can trigger apoptosis.

In addition, LTBR can lead to the release of the cytokine interleukin 8.
