## **Product Name: Recombinant Human TIGIT (C-Fc)**

Catalog #: PHH1609

### **Summary**

Name TIGIT/VSIG9/VSTM3/T-cell immunoreceptor with Ig and ITIM domains

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/µg as determined by LAL test.

Construction Recombinant Human T-cell Immunoreceptor With Ig And ITIM Domains is

> produced by our Mammalian expression system and the target gene encoding Met22-Pro141 is expressed with a human IgG1 Fc tag at the C-

terminus.

Accession # O495A1

Host **Human Cells** 

**Species** Human

**Predicted Molecular Mass** 39.7 KDa

**Formulation** Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

The product is shipped at ambient temperature. Upon receipt, store it **Shipping** 

immediately at the temperature listed below.

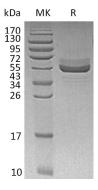

Stability&Storage Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. ### **Background**

Alternative Names T-cell immunoreceptor with Ig and ITIM domains; V-set and immunoglobulin

domain-containing protein 9; V-set and transmembrane domain-containing

protein 3; Tigit; VSIG9; VSTM3 **Background**T cell immunoreceptor with Ig

T cell immunoreceptor with Ig and ITIM domains (TIGIT) is a member of the CD28 family within the Ig superfamily of proteins. TIGIT is expressed on NK cells and subsets of activated, memory and regulatory T cells, and particularly on follicular helper T cells within secondary lymphoid organs. It binds to CD155 and Nectin-2 that appear on dendritic cells (DC) and endothelium. Ligation of TIGIT on T cells down-regulates TCR-mediated activation and subsequent proliferation, while NK cell TIGIT ligation blocks NK cell cytotoxicity. Through CD155 and Nectin-2, which also interact with DNAM-1/CD226 and CD96/Tactile, TIGIT is part of an interacting

network of Ig superfamily members that may augment or oppose each other. In

particular, TIGIT binding to CD155 can antagonize the effects of DNAM1.
