Product Name: Recombinant Human TREML2 (C-Fc) Catalog #: PHH1721

EnkiLife

Summary

Name TREML2/TLT-2/Trem-like transcript 2 protein

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/µg as determined by LAL test.

Construction Recombinant Human Triggering Receptor Expressed on Myeloid Cells-like

> Protein 2 is produced by our Mammalian expression system and the target gene encoding Gly19-Ser268 is expressed with a human IgG1 Fc tag at the C-

terminus.

AAI25079.1 Accession #

Host **Human Cells**

Species Human

Predicted Molecular Mass 54.2 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

The product is shipped at ambient temperature. Upon receipt, store it **Shipping**

immediately at the temperature listed below.

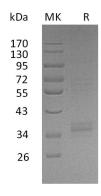

Stability&Storage Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Background

Alternative Names Trem-like transcript 2 protein; TLT2; Triggering receptor expressed on myeloid

cells-like protein 2; TLT2; C6orf76

BackgroundTrem-like transcript 2 protein (TLT2), also known as Triggering receptor expressed

on myeloid cells-like protein 2, TLT2 and C6orf76, is single-pass type I membrane protein. TREML2 contains one Ig-like V-type domain, which can be induced in CD4 T-cell by concanavalin-A. As a cell surface receptor, TREML2 may play a role in the innate and adaptive immune response. TREML2 also acts as a counter-receptor for CD276 and interaction with CD276 on T-cells enhances T-cell activation. It has shown that TREML2 may be involved in the innate immune response based on its expression profile and the fact that it is up-regulated in response to inflammation.
