## **Product Name: Recombinant Human VSIG4 (C-Fc)**

Catalog #: PHH1827

### **Summary**

Name VSIG4

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/μg as determined by LAL test.

Construction Recombinant Human V-Set And Immunoglobulin Domain-Containing Protein

4 is produced by our Mammalian expression system and the target gene encoding Arg20-Val284 is expressed with a human IgG1 Fc tag at the C-

terminus.

Accession # Q9Y279

**Host** Human Cells

**Species** Human

Predicted Molecular Mass 56.3 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Store at  $\leq$ -70°C, stable for 6 months after receipt. Store at  $\leq$ -70°C, stable for 3

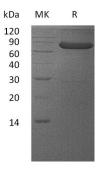

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

**Reconstitution** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. ## **Background**

# **Product Name: Recombinant Human VSIG4 (C-Fc)**

Catalog #: PHH1827

**Alternative Names** 

V-set and immunoglobulin domain-containing protein 4; VSIG4;Protein Z39Ig;Z39IG;CRIg

Background

V-set and immunoglobulin domain-containing protein 4(VSIG4) is a transmembrane protein contains a signal peptide, a V-type Ig-like domain, a C2-type Ig-like domain, several potential O-glycosylation sites, and an intracellular domain with 2 potential phosphorylation sites and is structurally related to the B7 family of immune regulatory proteins. This protein is also a receptor for the complement component 3 fragments C3b and iC3b.The main function is strong negative regulator of T-cell proliferation and IL2 production and it is also potent inhibitor of the alternative complement pathway convertases. It abundantly expressed in several fetal tissues such as adult tissues, highest expression in lung and placenta and it also expressed in resting macrophages.
