Product Name: Recombinant Human IL-1RAPL1 (C-Fc)

Catalog #: PHH1955

Summary

Name IL-1 RAPL1/IL-1 R8/Oligophrenin-4/TIGIRR-2

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human Interleukin-1 Receptor Accessory Protein-like 1 is

produced by our Mammalian expression system and the target gene encoding Leu19-Thr357 is expressed with a human IgG1 Fc tag at the C-

terminus.

Accession # Q9NZN1

Host Human Cells

Species Human

Predicted Molecular Mass 68 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Alternative Names

Interleukin-1 Receptor Accessory Protein-Like 1; IL-1-RAPL-1; IL-1RAPL-1; IL1RAPL-1; Oligophrenin-4; Three Immunoglobulin Domain-Containing IL-1 Receptor-Related 2; TIGIRR-2; X-Linked Interleukin-1 Receptor Accessory Protein-Like 1; IL1RAPL1; OPHN4

Background

Interleukin-1 receptor accessory protein-like 1, also known as IL1RAPL1, can be detected at low levels in heart, skeletal muscle, ovary, skin, amygdala, caudate nucleus, corpus callosum, hippocampus, substantia nigra and thalamus. IL1RAPL1 functions as a homodimer, it interacts with NCS1, PTPRD. This interaction is PTPRD-splicing-dependent and induces pre- and post-synaptic differentiation of neurons and is required for IL1RAPL1-mediated synapse formation. During dendritic spine formation, it can bidirectionally induce pre- and post-synaptic differentiation of neurons by trans-synaptically binding to PTPRD.
