# **Product Name: Recombinant Human GAS6 (C-6His)**

Catalog #: PHH2163

### **Summary**

Name GAS6

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/μg as determined by LAL test.

Construction Recombinant Human Growth Arrest-specific Protein 6 is produced by our

Mammalian expression system and the target gene encoding Ala31-Ala678 is

expressed with a 6His tag at the C-terminus.

Accession # Q14393-2

**Host** Human Cells

**Species** Human

Predicted Molecular Mass 72.7 KDa

Formulation Supplied as a 0.2 µm filtered solution of PBS, 10% Glycerol, pH 7.4.

**Shipping** The product is shipped on dry ice/polar packs. Upon receipt, store it immediately

at the temperature listed below.

**Stability&Storage** Store at  $\leq$ -70°C, stable for 6 months after receipt. Store at  $\leq$ -70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

## **Product Name: Recombinant Human GAS6 (C-6His)**

Catalog #: PHH2163

#### **Alternative Names**

AXLLG; AXLLGAXL stimulatory factor; AXSFAXL receptor tyrosine kinase ligand; Gas6; GAS-6; growth arrest-specific 6; growth arrest-specific protein 6

### **Background**

GAS6 (Growth arrest-specific protein 6) is also known as AXL receptor tyrosine kinase ligand, AXLLG, is a multimodular protein that is up-regulated by a wide variety of cell types in response to growth arrest. Gas6 binds and induces signaling through the receptor tyrosine kinases Axl, Dtk, and Mer whose signaling is implicated in cell growth and survival, cell adhesion and cell migration. GAS6/AXL signaling plays a role in various processes such as endothelial cell survival during acidification by preventing apoptosis, optimal cytokine signaling during human natural killer cell development, hepatic regeneration, gonadotropin-releasing hormone neuron survival and migration, platelet activation, or regulation of thrombotic responses.
