

Summary

Name	B7-H3/CD276	
Purity	Greater than 95% as determined by reducing SDS-PAGE	
Endotoxin level	<1 EU/µg as determined by LAL test.	
Construction	Recombinant Mouse B7 Homolog 3 is produced by our Mammalian expression system and the target gene encoding Val29-Phe244 is expressed with a 6His tag at the C-terminus.	
Accession #	Q8VE98	
Host	Human Cells	
Species	Mouse	
Predicted Molecular Mass	24.3 KDa	
Formulation	Lyophilized from a 0.2 μ m filtered solution of PBS, pH 7.4.	
Shipping	The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature listed below.	
Stability&Storage	Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3 months under sterile conditions after opening. Please minimize freeze-thaw cycles.	
Reconstitution	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Background

Alternative NamesCD276 antigen; CD276; B7 homolog 3; B7-H3;CD276BackgroundCD276, also known as B7-H3, is a member of the B7 superfamily with signature IgV
and IgG regions in extracellular domains. It is a type I transmembrane protein and
shares 20–27% amino acid identity with other B7 family members. B7-H3 is
involved in the activation of T lymphocytes, and regulates murine bone formation.
It is also reported that B7-H3 may play an important role in muscle-immune
interactions, providing further evidence of the active role of muscle cells in local
immunoregulatory processes. B7-H3 is expressed on T-cells, natural killer cells, and
antigen presenting cells, as well as some non-immune cells, such as osteoblasts,
fibroblasts, fibroblast-like synoviocytes and epithelial cells. High expression of B7-
H3 in tumor vasculature also correlates with poor survival in patients, suggesting
that it may play a role in tumor cell migration.
