

Product Name: Recombinant Mouse TACI (C-Fc)
Catalog #: PHM1604

Summary

Name	TACI/TNFRSF13B/CD267
Purity	Greater than 95% as determined by reducing SDS-PAGE
Endotoxin level	<1 EU/μg as determined by LAL test.
Construction	Recombinant Mouse Transmembrane Activator And CAML Interactor is produced by our Mammalian expression system and the target gene encoding Phe5-Thr129 is expressed with a human IgG1 Fc tag at the C-terminus.
Accession #	Q9ET35
Host	Human Cells
Species	Mouse
Predicted Molecular Mass	41.1 KDa
Formulation	Lyophilized from a 0.2 μm filtered solution of PBS, pH 7.4.
Shipping	The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature listed below.
Stability&Storage	Lyophilized protein should be stored at ≤ -20°C, stable for one year after receipt. Reconstituted protein solution can be stored at 2-8°C for 2-7 days. Aliquots of reconstituted samples are stable at ≤ -20°C for 3 months.
Reconstitution	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100μg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Product Name: Recombinant Mouse TACI (C-Fc)
Catalog #: PHM1604

Alternative Names

Tumor necrosis factor receptor superfamily member 13B; Transmembrane activator and CAML interactor; CD267; Tnfrsf13b

Background

Tumor necrosis factor receptor superfamily member 13B, also known as TNFRSF13B or more commonly as TACI (transmembrane activator and CAML interactor), is a transmembrane receptor protein found predominantly on the surface of B cells, which are an important part of the immune system.

Note

For Research Use Only , Not for Diagnostic Use.
