## **Product Name: Recombinant Mouse TFF3 (C-6His)**

Catalog #: PHM1715

#### **Summary**

Name TFF3/Trefoil Factor 3

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/µg as determined by LAL test.

Construction Recombinant Mouse Trefoil Factor 3 is produced by our Mammalian

expression system and the target gene encoding Ala23-Phe81 is expressed

with a 6His tag at the C-terminus.

Accession # Q62395

Host **Human Cells** 

**Species** Mouse

**Predicted Molecular Mass** 7.3 KDa

**Formulation** Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

**Shipping** The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 Stability&Storage

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. ### **Background**

# Product Name: Recombinant Mouse TFF3 (C-6His) Catalog #: PHM1715

**Alternative Names** 

Trefoil factor 3; Intestinal trefoil factor; mITF; Tff3; Itf

**Background** 

Trefoil factors (TFF) are secretory products of mucin producing cells. They play a key role in the maintenance of the surface integrity of oral mucosa and enhance healing of the gastrointestinal mucosa by a process called restitution. TFF comprises the gastric peptides (TFF1), spasmolytic peptide (TFF2), and the intestinal trefoil factor (TFF3). They have an important and necessary role in epithelial restitution within the gastrointestinal tract. Members of the trefoil family are characterized by having at least one copy of the trefoil motif, a 40-amino acid domain that contains three conserved disulfide bonds. They are stable secretory proteins expressed in gastrointestinal mucosa. Trefoil Factor 3(TFF3) is involved in the maintenance and repair of the intestinal mucosa. TFF3 promotes the mobility of epithelial cells in healing processes (motogen).
