# Product Name: Recombinant Mouse VEGF-D (C-6His) Catalog #: PHM1811

### **Summary**

Name VEGFD/FIGF/Vascular endothelial growth factor D

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/μg as determined by LAL test.

Construction Recombinant Mouse Vascular Endothelial Growth Factor D is produced by

our Mammalian expression system and the target gene encoding Phe98-

Ser206 is expressed with a 6His tag at the C-terminus.

Accession # P97946

**Host** Human Cells

**Species** Mouse

Predicted Molecular Mass 13.1 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of 20mM Tris-HCl, 10% Sucrose, 6%

Mannitol, 0.1% Tween80, 1mM EDTA, pH 8.0.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Store at  $\leq$ -70°C, stable for 6 months after receipt. Store at  $\leq$ -70°C, stable for 3

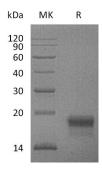

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

**Reconstitution** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. ## **Background**

# Product Name: Recombinant Mouse VEGF-D (C-6His) Catalog #: PHM1811

Alternative Names Vascular endothelial growth factor D; c-Fos-induced growth factor; FIGF; VEGFD

Background Mouse vascular endothelial growth factor D, (VEGFD) is a member of the platelet-

derived growth factor/vascular endothelial growth factor (PDGF/VEGF) family. VEGFD is a secreted protein and highly expressed in fetal and adult lung. It undergoes a complex proteolytic maturation, generating multiple processed forms that bind and activate VEGFR-2 and VEGFR-3 receptors. The structure and function of this protein is similar to VEGFC. VEGFD is growth factor which active in angiogenesis, lymphangiogenesis, and endothelial cell growth, stimulating their proliferation and migration and also has effects on the permeability of blood

vessels.
