# Product Name: Recombinant Mouse Fetuin A (C-10His) Catalog #: PHM1848

### **Summary**

Name α-2-HS-Glycoprotein/AHSG/Fetuin A

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/µg as determined by LAL test.

Construction Recombinant Mouse Alpha-2-HS-Glycoprotein is produced by our

Mammalian expression system and the target gene encoding Ala19-Ile345 is

expressed with a 10His tag at the C-terminus.

Accession # P29699

Host **Human Cells** 

**Species** Mouse

**Predicted Molecular Mass** 36.7 KDa

**Formulation** Lyophilized from a 0.2 µm filtered solution of 20mM Tris-HCl, 150mM NaCl, pH

7.5.

The product is shipped at ambient temperature. Upon receipt, store it **Shipping** 

immediately at the temperature listed below.

Stability&Storage Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

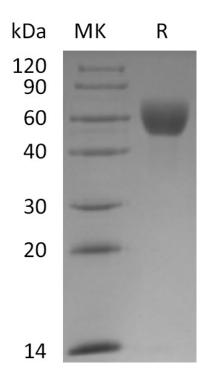

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. #### **Alternative Names**

Alpha-2-HS-glycoprotein; Ahsg; Countertrypin; Fetuin-A; Fetua

## **Background**

Alpha-2-HS-glycoprotein (AHSG) is a glycoprotein that is composed of two subunits, the A and B chains, belongs to the Cystatin family of proteases inhibitors. It is highly expressed in embryonic cells and adult hepatocytes, and is expressed to a lesser extent in monocytes/macrophages. AHSG is an important circulating inhibitor of calcification in vivo, and is downregulated during the acute-phase response. It is involved in several functions, such as endocytosis, brain development and the formation of bone tissue. In addition, AHSG may influence the resolution of inflammation by modulating the phagocytosis of apoptotic cells by macrophages. ASHG blocks TGF-beta-dependent signaling in osteoblastic cells.
