# **Product Name: Recombinant Mouse IL-23 (C-6His)**

Catalog #: PHM1959

## **Summary**

Name IL-23/Interleukin-23(IL23A&IL12B)

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/μg as determined by LAL test.

Construction Recombinant Mouse Interleukin-23 is produced by our Mammalian

expression system and the target gene encoding Val22-Ala196&Met23-

Ser335 is expressed with a 6His tag at the C-terminus.

**Accession** # Q9EQ14&P43432

**Host** Human Cells

**Species** Mouse

Predicted Molecular Mass 19.7&36.8 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of PBS, 5% Trehalose ,5% Mannitol,

0.01% Tween80, pH7.4.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Store at  $\leq$ -70°C, stable for 6 months after receipt. Store at  $\leq$ -70°C, stable for 3

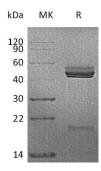

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

**Reconstitution** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. ## **Background**

# **Product Name: Recombinant Mouse IL-23 (C-6His)**

Catalog #: PHM1959

Alternative Names SGRF; IL-23p19; CLMF p40; IL-12 subunit p40; NKSF2

**Background** Interleukin 23 (IL-23) is a heterodimeric cytokine composed of two disulfide-linked

subunits, a p19 subunit that is unique to IL-23, and a p40 subunit that is shared with IL-12. The p19 subunit has homology to the p35 subunit of IL-12, as well as to other single chain cytokines such as IL-6 and IL-11. The p40 subunit is homologous to the extracellular domains of the hematopoietic cytokine receptors. Although p19 is expressed by activated macrophages, dendritic cells, T cells, and endothelial cells, only activated macrophages and dendritic cells express p40 concurrently to produce IL-23. IL-23 has biological activities that are similar to, but distinct from IL-12. Both IL-12 and IL-23 induce proliferation and IFN-gamma production by human T cells. While IL-12 acts on both naive and memory human T cells, the

effects of IL-23 is restricted to memory T cells.
