## **Product Name: Recombinant Mouse TNF RII (C-Fc)**

Catalog #: PHM2277

### **Summary**

Name TNF RII/TNFRSF1B/CD120b/TNFR2/TNF Receptor II/Tumor Necrosis Factor

Receptor II

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/μg as determined by LAL test.

Construction Recombinant Mouse Tumor Necrosis Factor Receptor II is produced by our

Mammalian expression system and the target gene encoding Val23-Gly258 is

expressed with a human IgG1 Fc tag at the C-terminus.

Accession # Q545P4

**Host** Human Cells

**Species** Mouse

Predicted Molecular Mass 52.3 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

**Stability&Storage** Store at  $\leq$ -70°C, stable for 6 months after receipt. Store at  $\leq$ -70°C, stable for 3

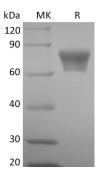

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

**Reconstitution** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. ## Background

# Product Name: Recombinant Mouse TNF RII (C-Fc) Catalog #: PHM2277

**C** EnkiLife

Alternative Names Tumor necrosis factor receptor superfamily member 1b; Tnfrsf1b

Background Tumor Necrosis Factor Receptor Superfamily Member 1B (TNFRSF1B) is a member

of the Tumor Necrosis Factor Receptor Superfamily. TNFRSF1B contains four TNFR-Cys repeats. TNFRSF1B can be cleaved into the following 2 chains: Tumor necrosis factor receptor superfamily member 1b and membrane form and Tumor necrosis factor-binding protein 2. TNFRSF1B is a receptor with high affinity for TNFSF2/TNF- $\alpha$  and approximately 5-fold lower affinity for homotrimeric TNFSF1/lymphotoxin- $\alpha$ . TNFRSF1B mediates most of the metabolic effects of TNF- $\alpha$ . TNF- $\alpha$ -induced apoptosis suggests that it regulates TNF- $\alpha$  function by antagonizing its biological

activity.
