

Summary

Production Name	POLR2J1 Rabbit Polyclonal Antibody
Description	Rabbit Polyclonal Antibody
Host	Rabbit
Application	WB,IHC-P
Reactivity	Human, Mouse

Performance

Conjugation	Unconjugated
Modification	Unmodified
lsotype	IgG
Clonality	Polyclonal
Form	Liquid
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw
	cycles.
Buffer	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.
Purification	Affinity purification

Immunogen

Gene Name	POLR2J	
Alternative Names	POLR2J; POLR2J1; DNA-directed RNA polymerase II subunit RPB11-a; RNA polymerase	
	II subunit B11-a; RPB11a; DNA-directed RNA polymerase II subunit J-1; RNA	
	polymerase II 13.3 kDa subunit	
Gene ID	5439.0	
SwissProt ID	P52435.The antiserum was produced against synthesized peptide derived from human	
	RPB11. AA range:10-59	

Application

Dilution Ratio	WB 1:500-2000, IHC-P 1:50-300
Molecular Weight	20kDa

Background

This gene encodes a subunit of RNA polymerase II, the polymerase responsible for synthesizing messenger RNA in eukaryotes. The product of this gene exists as a heterodimer with another polymerase subunit; together they form a core subassembly unit of the polymerase. Two similar genes are located nearby on chromosome 7q22.1 and a pseudogene is found on chromosome 7p13. [provided by RefSeq, Jul 2008],function:DNA-dependent RNA polymerase catalyzes the transcription of DNA into RNA using the four ribonucleoside triphosphates as substrates. Component of RNA polymerase II which synthesizes mRNA precursors and many functional non-coding RNAs. Pol II is the central component of the basal RNA polymerase II transcription machinery. It is composed of mobile elements that move relative to each other. RPB11 is part of the core element with the central large cleft.,similarity:Belongs to the archaeal rpoL/eukaryotic RPB11/RPC19 RNA polymerase subunit family.,subunit:Component of the RNA polymerase II (Pol II) complex consisting of 12 subunits. Interacts with AATF, tissue specificity:Ubiquitously expressed. High expression was found in heart and skeletal muscle.,

Research Area

Purine metabolism;Pyrimidine metabolism;RNA polymerase;Huntington's disease;

Image Data

Western blot analysis of lysates from RAW264.7 cells, using RPB11 Antibody. The lane on the right is blocked with the
