Product Name: PSMC6 Rabbit Polyclonal Antibody
Catalog #: APRab16614

Summary

Production Name	PSMC6 Rabbit Polyclonal Antibody
Description	Rabbit Polyclonal Antibody
Host	Rabbit
Application	WB,IHC-P
Reactivity	Human,Mouse

Performance

Conjugation	Unconjugated
Modification	Unmodified
Isotype	IgG
Clonality	Polyclonal
Form	Liquid
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.
Buffer	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.
Purification	Affinity purification

Immunogen

Gene Name	PSMC6
Alternative Names	PSMC6; SUG2; 26S protease regulatory subunit 10B; 26S proteasome AAA-ATPase subunit RPT4; Proteasome 26S subunit ATPase 6; Proteasome subunit p42
Gene ID	5706.0
SwissProt ID	P62333.The antiserum was produced against synthesized peptide derived from human PSMC6. AA range:61-110

Application

Dilution Ratio	WB 1:500-2000, IHC-P 1:50-300
Molecular Weight	44kDa

Product Name: PSMC6 Rabbit Polyclonal Antibody
Catalog #: APRab16614

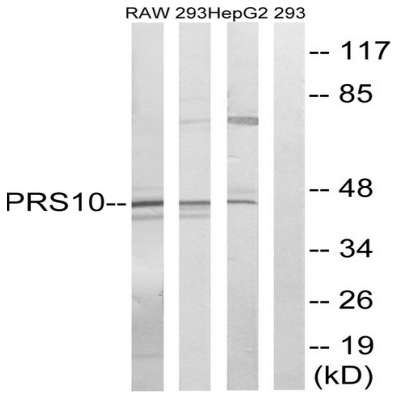
Background

proteasome 26S subunit, ATPase 6(PSMC6) Homo sapiens The 26S proteasome is a multicatalytic proteinase complex with a highly ordered structure composed of 2 complexes, a 20S core and a 19S regulator. The 20S core is composed of 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alpha subunits and 2 rings are composed of 7 beta subunits. The 19S regulator is composed of a base, which contains 6 ATPase subunits and 2 non-ATPase subunits, and a lid, which contains up to 10 non-ATPase subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. An essential function of a modified proteasome, the immunoproteasome, is the processing of class I MHC peptides. This gene encodes one of the ATPase subunits, a member of the triple-A family of ATPases which have a chaperone-like activity. Pseudogenes have been identified on chromfunction:The 26S protease is involved in the ATP-dependent degradation of ubiquitinated proteins. The regulatory (or ATPase) complex confers ATP dependency and substrate specificity to the 26S complex.,similarity:Belongs to the AAA ATPase family.,subunit:Found in the multi-protein complexes: the 26S proteasome (formed from the 20S proteasome and PA700), and the modulator. PA700 consists of 28 subunits arranged to form a cylinder-shaped complex by four stacked rings, each containing seven subunits. Interacts with PAAF1.,

Research Area

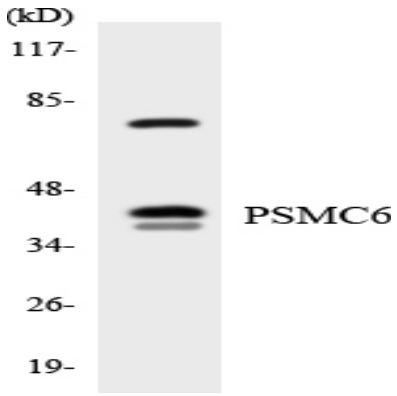
Proteasome;

Image Data

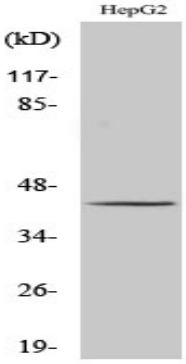


Western blot analysis of lysates from HepG2, 293, and RAW264.7 cells, using PSMC6 Antibody. The lane on the right is blocked with the synthesized peptide.

Product Name: PSMC6 Rabbit Polyclonal Antibody
Catalog #: APRab16614



Western blot analysis of the lysates from HeLa cells using PSMC6 antibody.



Western Blot analysis of various cells using PSMC6 Polyclonal Antibody
