

Product Name: MSLN Mouse Monoclonal Antibody

Catalog #: AMM82325

For research use only.

Summary

Description Mouse monoclonal Antibody

1mg/ml

HostMouseApplicationELISA,FCReactivityHuman

ConjugationUnconjugatedModificationUnmodifiedIsotypeMouse IgG1ClonalityMonoclonalFormLiquid

Storage Aliquot and store at -20°C (valid for 12 months). Avoid freeze/thaw cycles.

Shipping Ice bags

Buffer Purified antibody in PBS with 0.05% sodium azide

Purification Affinity Purification

Application

Concentration

Dilution Ratio ELISA 1:5000-1:20000,FC 1:200-1:400

Molecular Weight 69kDa

Antigen Information

Gene Name MSLN

Alternative Names MPF; SMRP
Gene ID 10232.0
SwissProt ID 013421

Immunogen Purified recombinant fragment of human MSLN (AA: 37-286) expressed in E. Coli.

Background

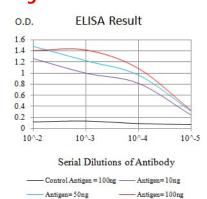

This gene encodes a preproprotein that is proteolytically processed to generate two protein products, megakaryocyte potentiating factor and mesothelin. Megakaryocyte potentiating factor functions as a cytokine that can stimulate colony formation of bone marrow megakaryocytes. Mesothelin is a glycosylphosphatidylinositol-anchored cell-surface protein that

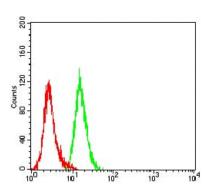

may function as a cell adhesion protein. This protein is overexpressed in epithelial mesotheliomas, ovarian cancers and in specific squamous cell carcinomas. Alternative splicing results in multiple transcript variants, at least one of which encodes an isoform that is proteolytically processed.

Research Area

Image Data

Black line: Control Antigen (100 ng);Purple line: Antigen (10ng); Blue line: Antigen (50 ng); Red line:Antigen (100 ng)

Flow cytometric analysis of Hela cells using MSLN mouse mAb (green) and negative control (red).
