

Product Name: BMP7 (2E15) Rabbit Monoclonal Antibody
Catalog #: AMRe07601

Summary

Production Name	BMP7 (2E15) Rabbit Monoclonal Antibody
Description	Rabbit Monoclonal Antibody
Host	Rabbit
Application	WB,IP
Reactivity	Human

Performance

Conjugation	Unconjugated
Modification	Unmodified
Isotype	IgG
Clonality	Monoclonal
Form	Liquid
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.
Buffer	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% New type preservative N and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.
Purification	Affinity purification

Immunogen

Gene Name	BMP7
Alternative Names	Bmp7; Bone morphogenetic protein 7; Eptotermin alfa; OP 1; Osteogenic protein 1;
Gene ID	655.0
SwissProt ID	P18075.

Application

Dilution Ratio	WB 1:1000, IP 1:20-1:50
Molecular Weight	49kDa

Product Name: BMP7 (2E15) Rabbit Monoclonal Antibody
Catalog #: AMRe07601

Background

Induces cartilage and bone formation. May be the osteoinductive factor responsible for the phenomenon of epithelial osteogenesis. Plays a role in calcium regulation and bone homeostasis. Growth factor of the TGF-beta superfamily that plays important role in various biological processes, including embryogenesis, hematopoiesis, neurogenesis and skeletal morphogenesis (PubMed: [31208997](http://www.uniprot.org/citations/31208997)). Initiates the canonical BMP signaling cascade by associating with type I receptor ACVR1 and type II receptor ACVR2A (PubMed: [9748228](http://www.uniprot.org/citations/9748228), PubMed: [12667445](http://www.uniprot.org/citations/12667445)). Once all three components are bound together in a complex at the cell surface, ACVR2A phosphorylates and activates ACVR1. In turn, ACVR1 propagates signal by phosphorylating SMAD1/5/8 that travel to the nucleus and act as activators and repressors of transcription of target genes (PubMed: [12478285](http://www.uniprot.org/citations/12478285)). For specific functions such as growth cone collapse in developing spinal neurons and chemotaxis of monocytes, uses also BMPR2 as type II receptor (PubMed: [31208997](http://www.uniprot.org/citations/31208997)). Can also signal through non-canonical pathways such as P38 MAP kinase signaling cascade that promotes brown adipocyte differentiation through activation of target genes, including members of the SOX family of transcription factors (PubMed: [27923061](http://www.uniprot.org/citations/27923061)).

Research Area

Image Data

Western blot analysis of BMP7 expression in human fetal kidney lysate.

Note

For research use only.
