

**Product Name:** HLA-Drb1 (11B17) Rabbit Monoclonal Antibody  
**Catalog #:** AMRe12088

---

## Summary

|                        |   |
|------------------------|---|
| <b>Production Name</b> | HLA-Drb1 (11B17) Rabbit Monoclonal Antibody |
| <b>Description</b>     | Rabbit Monoclonal Antibody                  |
| <b>Host</b>            | Rabbit                                      |
| <b>Application</b>     | WB,IHC-P,ICC/IF,IF-P                        |
| <b>Reactivity</b>      | Human                                       |

## Performance

|                     |  |
|---------------------|--|
| <b>Conjugation</b>  | Unconjugated   |
| <b>Modification</b> | Unmodified   |
| <b>Isotype</b>      | IgG  |
| <b>Clonality</b>    | Monoclonal   |
| <b>Form</b>         | Liquid   |
| <b>Storage</b>      | Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.   |
| <b>Buffer</b>       | Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% New type preservative N and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle. |
| <b>Purification</b> | Affinity purification  |

## Immunogen

|                          |                        |
|--------------------------|------------------------|
| <b>Gene Name</b>         | HLA-DRB1               |
| <b>Alternative Names</b> | HLA-Drb1; DW2.2/DR2.2; |
| <b>Gene ID</b>           | 3123.0                 |
| <b>SwissProt ID</b>      | P01911.                |

## Application

|                         |  |
|-------------------------|--|
| <b>Dilution Ratio</b>   | WB 1:1000-1:5000, IHC-P/IF-P 1:200-1:2000, ICC/IF 1:50 |
| <b>Molecular Weight</b> | 30kDa  |

**Product Name: HLA-Drb1 (11B17) Rabbit Monoclonal Antibody**  
**Catalog #: AMRe12088**

---

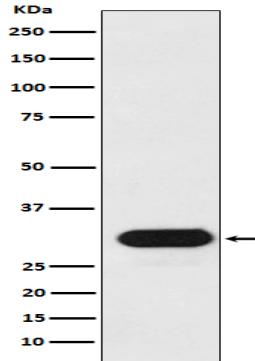

## Background

Binds peptides derived from antigens that access the endocytic route of antigen presenting cells (APC) and presents them on the cell surface for recognition by the CD4 T-cells. A beta chain of antigen-presenting major histocompatibility complex class II (MHCII) molecule. In complex with the alpha chain HLA-DRA, displays antigenic peptides on professional antigen presenting cells (APCs) for recognition by alpha-beta T cell receptor (TCR) on HLA-DRB1-restricted CD4-positive T cells. This guides antigen-specific T-helper effector functions, both antibody-mediated immune response and macrophage activation, to ultimately eliminate the infectious agents and transformed cells (PubMed:[29884618](http://www.uniprot.org/citations/29884618), PubMed:[22327072](http://www.uniprot.org/citations/22327072), PubMed:[27591323](http://www.uniprot.org/citations/27591323), PubMed:[8642306](http://www.uniprot.org/citations/8642306), PubMed:[15265931](http://www.uniprot.org/citations/15265931), PubMed:[31495665](http://www.uniprot.org/citations/31495665), PubMed:[16148104](http://www.uniprot.org/citations/16148104)). Typically presents extracellular peptide antigens of 10 to 30 amino acids that arise from proteolysis of endocytosed antigens in lysosomes (PubMed:[8145819](http://www.uniprot.org/citations/8145819)). In the tumor microenvironment, presents antigenic peptides that are primarily generated in tumor- resident APCs likely via phagocytosis of apoptotic tumor cells or macropinocytosis of secreted tumor proteins (PubMed:[31495665](http://www.uniprot.org/citations/31495665)). Presents peptides derived from intracellular proteins that are trapped in autolysosomes after macroautophagy, a mechanism especially relevant for T cell selection in the thymus and central immune tolerance (PubMed:[17182262](http://www.uniprot.org/citations/17182262), PubMed:[23783831](http://www.uniprot.org/citations/23783831)). The selection of the immunodominant epitopes follows two processing modes: 'bind first, cut/trim later' for pathogen-derived antigenic peptides and 'cut first, bind later' for autoantigens/self-peptides (PubMed:[25413013](http://www.uniprot.org/citations/25413013)). The anchor residue at position 1 of the peptide N-terminus, usually a large hydrophobic residue, is essential for high affinity interaction with MHCII molecules (PubMed:[8145819](http://www.uniprot.org/citations/8145819)).

## Research Area

## Image Data

**Product Name:** HLA-Drb1 (11B17) Rabbit Monoclonal  
**Antibody**  
**Catalog #:** AMRe12088

Western blot analysis of HLA-Drb1 expression in Ramos cell lysate.
