Background

Cell localization:Membrane.This gene encodes a type I integral membrane glycoprotein.The encoded protein acts as a receptor and binds to both soluble and immobilized hyaluronan. This protein may function in lymphatic hyaluronan transport and have

a role in tumor metastasis. [provided by RefSeq, Jul 2008],

Research Area

Image Data

Western blot analysis of lysates from Rat lung cells, using LYVE1 Rabbit mAb. The HRP-conjugated Goat anti-Rabbit IgG antibody was used to detect the antibody.
