Background

Chaperonin implicated in mitochondrial protein import and macromolecular assembly. Together with Hsp10, facilitates the correct folding of imported proteins. May also prevent misfolding and promote the refolding and proper assembly of unfolded

polypeptides generated under stress conditions in the mitochondrial matrix.

Research Area

Image Data

Western blot analysis of Retinoic Acid Receptor beta expression in MCF7 cell lysate.

All lanes use the Antibody at 1:2K dilution for 1 hour at room temperature.
