

Product Name: DDB2 Rabbit Monoclonal Antibody

Catalog #: AMRe86412

For research use only.

Summary

Description Recombinant rabbit monoclonal antibody

Host Rabbit
Application WB,IHC
Reactivity Human

ConjugationUnconjugatedModificationUnmodified

Isotype IgG

Clonality Monoclonal
Form Liquid

Concentration 0.09mg/ml. The concentration of this product may be batch-dependent. **Storage** Aliquot and store at -20°C (valid for 12 months). Avoid freeze/thaw cycles.

Shipping Ice bags

Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and **Buffer**

0.05% protective protein. Stable for 12 months from date of receipt.

Purification Affinity Purification

Application

Dilution Ratio WB 1:1000-1:5000,IHC 1:500-1:2000

Molecular Weight Calculated MW:48 kDa; Observed MW:48 kDa

Antigen Information

Gene Name DDB2

Alternative Names XPE; DDBB; UV-DDB2

 Gene ID
 1643

 SwissProt ID
 Q92466

Immunogen A synthetic peptide of human DDB2

Background

This gene encodes a protein that is necessary for the repair of ultraviolet light-damaged DNA. This protein is the smaller subunit of a heterodimeric protein complex that participates in nucleotide excision repair, and this complex mediates the

ubiquitylation of histones H3 and H4, which facilitates the cellular response to DNA damage. This subunit appears to be required for DNA binding. Mutations in this gene cause xeroderma pigmentosum complementation group E, a recessive disease that is characterized by an increased sensitivity to UV light and a high predisposition for skin cancer development, in some cases accompanied by neurological abnormalities. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2014]

Research Area

Image Data

Western blot analysis of extracts from Raji cells using DDB2 Rabbit Monoclonal Antibody at 1:1000.
