

Product Name: Glutamine Synthetase Rabbit Monoclonal Antibody Catalog #: AMRe86604

For research use only.

Summary

Description Recombinant rabbit monoclonal antibody

Host Rabbit
Application WB,IHC

Reactivity Human, Mouse
Conjugation Unconjugated
Modification Unmodified

Isotype IgG

Clonality Monoclonal
Form Liquid

Concentration 0.09mg/ml. The concentration of this product may be batch-dependent. **Storage** Aliquot and store at -20°C (valid for 12 months). Avoid freeze/thaw cycles.

Shipping Ice bags

Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and **Buffer**

0.05% protective protein. Stable for 12 months from date of receipt.

Purification Affinity Purification

Application

Dilution Ratio WB 1:500-1:2000,IHC 1:1000-1:5000

Molecular Weight Calculated MW:42 kDa; Observed MW:42 kDa

Antigen Information

Gene Name Glutamine Synthetase
Alternative Names GS; GLNS; PIG43; PIG59

 Gene ID
 2752

 SwissProt ID
 P15104

Immunogen Recombinant protein of human Glutamine Synthetase

Background

The protein encoded by this gene belongs to the glutamine synthetase family. It catalyzes the synthesis of glutamine from glutamate and ammonia in an ATP-dependent reaction. This protein plays a role in ammonia and glutamate detoxification,

acid-base homeostasis, cell signaling, and cell proliferation. Glutamine is an abundant amino acid, and is important to the biosynthesis of several amino acids, pyrimidines, and purines. Mutations in this gene are associated with congenital glutamine deficiency, and overexpression of this gene was observed in some primary liver cancer samples. There are six pseudogenes of this gene found on chromosomes 2, 5, 9, 11, and 12. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Dec 2014]

Research Area

Image Data

Western blot analysis of extracts from Mouse brain tissue using Glutamine Synthetase Rabbit Monoclonal Antibody at 1:1000.
